G-series

The Shape of NEXT

The NEXT generation in console design . . .

G-Series begins with studio presence - sleek, individual, and seductive. Engineered from experience - years of producing technical furniture for highly sensitive environments.

The differences are immediate and profound. Distinctive styling and build quality are industry shaping and head turning. Calculated lines of the G-Series enable unobstructed line-of-sight and line-of-sound while putting every essential control at your fingertips. Elevated chassis provides transparency to low frequencies, while the pitched surface and perforated grills intentionally foil early sound reflection and defeat build-up of standing waves.

With an adjustable height leg system with steel rails to support 19-32mm powder coated medite and 13-ply baltic birch components the G-Series provides unparalleled support of your studios most vital equipment.

Once you seat yourself at the controls, you'll realize the G-Series is the console you've always wanted. You'll never have to settle for prosaic or pedestrian - the Argosy G-Series is the shape of NEXT.
